

Residential Roof Top Solar Installation

Vendor Feasibility Report Format

1. Name of the Consumer: VASANTHAKUMAR B
2. Discom Consumer ID: 1155141031583
3. Discom ID: Kerala State Electricity Board Limited
4. PM Surya Shakti Portal ID: 457
5. Jan Samarth ID: ANS-SOLAR-13044028-3667576
6. Address for Installation: VASANTHA BHAVAN, PANAVALLY P O
7. District of Installation: ALAPPUZHA
8. State of Installation: KERALA
9. Pin Code of Installation: 688526
10. OEM Name: **JB-POWER ELECTRONICS**
11. Channel Partner, if any: 52/2104 D1, Kurikayil Building
Sahakarana Road, NH Bypass
12. EPC Contractor Address: Vyttila P.O., Kochi, Kerala - 682 019
13. EPC Contractor Bank Details: SOUTH INDIAN BANK, TOCH ROAD VYTTILA
- A/c No: **0417 0730 0002 0301** IFSC Code: **SIBL0000417**
14. RTS Capacity in KW Applied: 3kw
15. Actual RTS Capacity to be installed: 3kw
16. Is the vendor registered in MNRE Portal: Yes ☒ No
- (Note: Only vendors registered in MNRE portal will be allowed)**
17. Feasibility Report Status:
☒ Feasible ☐ Not Feasible
18. Project Cost (all inclusive): 2,25,000/-
19. Site Layout – Images (2-4 images to be uploaded):

Authorised Signatory of the vendor with Stamp

Guidance Checklist and Consumer Education for verification of adequacy on Environmental, Health, and Safety (EHS) requirements during appraisal and monitoring (Installation and Operation phases) of an individual project funded by SBI under the Additional Financing: Rooftop Solar Program for Residential Sector

A. Guidance Checklist for EPC / Project Developer

Go / No-Go Criteria

S. No.	EHS Requirement of GRPV Program	Yes/ No
1.	Confirm that Roofing material where the rooftop solar system is installed does not contain any carcinogenic material like broken or dilapidated Asbestos.	Yes

S. No.	EHS Requirements of GRPV Program	Status (State Yes/No/Not Applicable)	Guidance for ensuring compliance of EHS requirements by SBI	Review and Monitoring by SBI for adequacy and compliance of EHS requirements
Proposal Appraisal Phase				
1.	Whether the GRPV proposal requires lopping/pruning of tree branches to ensure a shadow-free area on the roof. If yes, state whether permissions are obtained from competent authorities for periodic lopping/pruning of trees	NA	If yes, check validity and conditions imposed on proponent by a competent authority, if any. If not, ensure first disbursement is released subject to the submission of valid permissions for lopping /Pruning of trees.	Review compliance with permissions including conditions if any by proponent.
2.	Whether access is available on a 24 X 365 (all days of the year irrespective of public holidays and Sundays).	Yes	If not, seek details of alternative safe access along with permission from owner.	Review the safety of the alternate access to the roof through site inspections.

S. No.	EHS Requirements of GRPV Program	Status (State Yes/No/Not Applicable)	Guidance for ensuring compliance of EHS requirements by SBI	Review and Monitoring by SBI for adequacy and compliance of EHS requirements
3.	Whether structural safety of the building, present condition of roof for leakages and/or cracks and adequacy of roof drainage has been assessed	Yes	Seek a structural safety and roof condition certificate from a certified/approved Chartered Engineer / Architect/ Competent person along with an action plan for rectifications and responsibilities if any required. If not, ensure the certificate is submitted by proponent prior to the first disbursement of the loan.	Check the validity, review the adequacy of arrangements.
4.	Whether the consent ¹ from residents / owners/ general body has been secured? Whether the residents are informed about the timelines of the construction process?	NA	If yes, please verify the consent document arrangements for maintaining secure and non-intrusive access to the installation site made and agreed with roof user/RWA. If not, ensure the first disbursement is released subject to the submission of a valid document. The developer should also submit the timelines for construction activities	Review compliance with permissions by project proponent through site inspection.
5.	Whether proposal includes estimated water requirements for washing of panels and dependable arrangements to draw or share water from the same water connection or overhead tanks with owner of the building	No	Seek details of water requirements and its sources along with required permissions from competent authorities, if any required.	Review the adequacy of arrangements through monitoring.
6.	Does the loan include financial assistance for batteries?	No	If yes, ensure that undertaking is available for compliance with current Batteries (Management) Rules 2021 and amendments thereof	Check whether an agreement with authorized recycler is in place.

¹ Include an arrangement for maintaining secure and non-intrusive access to the installation site made and agreed with roof user/RWA.

S. No.	EHS Requirements of GRPV Program	Status (State Yes/No/Not Applicable)	Guidance for ensuring compliance of EHS requirements by SBI	Review and Monitoring by SBI for adequacy and compliance of EHS requirements
Installation and Operation Phase				
7.	<u>Electrical Safety Approval</u> : Whether earthing of all plant and equipment / components under GRPV as per Indian Electricity Act, 1956 and amended up to 2000 has been made and tested by an approved competent agency	Yes	Seek certification from Chief Electrical Inspector to Government (CIG), if applicable for the rooftop solar system size as defined in the respective state (or central) regulations.	The undertaking will be taken from the proponent for compliance of the condition.

B. Safety guidelines to be adhered to by Installer / supplier / RESCO developer.
(only Advisory in nature)

S. No.	EHS Requirements of GRPV Program	Status (State Yes/No/Not Applicable)	Guidance for ensuring compliance of EHS requirements by SBI	Review and Monitoring by SBI for adequacy and compliance of EHS requirements
1.	Whether the proponent / installer has accreditation of ISO 14000, OHSAS 18001 or has received any recognitions for environmentally friendly initiatives or best EHS practices	Yes	If yes, seek details of valid certifications and or recognitions. Accreditation(s) give an indication to institutional the capacity of the proponent to EHS requirements.	
2.	All safety provisions like provision of rubber mats, electric shock chart, first aid box, fire extinguishers to handle all types of fire (ABC type of required capacity), sand buckets, etc. should be provided/installed at appropriate locations	Yes	Seek details of safety measures/provisions mandatorily provided prior to testing, trial run and commercial operations of GRPV facility.	Assess adequacy and review the safety provisions including exit routes provided and procedures followed during site inspections and monitoring.

S. No.	EHS Requirements of GRPV Program	Status (State Yes/No/Not Applicable)	Guidance for ensuring compliance of EHS requirements by SBI	Review and Monitoring by SBI for adequacy and compliance of EHS requirements
3.	The provisions to provide safety wear. like boots, hard hats (helmets), gloves, safety belts for personnel while working at heights among others have been included in the proposal.	Yes	Seek details of safety measures/provisions mandatorily provided to all workforce deployed on-site to ensure the safety of personnel at work.	Assess adequacy and review the safety provisions provided and procedures followed during site inspections and periodic monitoring.
4.	All personnel deployed for Installation / Operation and Maintenance are provided with basic training in first aid and firefighting.	Yes	An undertaking from the proponent that they will ensure that personnel deployed for Installation / O&M has a basic knowledge about first aid and fire-fighting instruments	
5.	All personnel deployed for Installation / Operation and Maintenance (Unskilled, semiskilled and skilled) should be paid at minimum wages as per applicable Minimum Wages Act of Government of India.	Yes	An undertaking from the Proponent, that they will ensure compliance of applicable Minimum Wages Act.	
6.	All personnel deployed for Installation / O&M are covered under workmen compensation insurance policy, EPF (Employee Provident Fund) Act, Gratuity Act etc. as may be applicable or relevant	Yes	An undertaking from proponent they will ensure that all personnel deployed for Installation/ O&M personnel will be covered with workmen compensation insurance policy and are provided with benefits of any other applicable acts.	The adequacy of insurances to be checked.
7.	End consumers have been sensitized to the potential safety issues in installing solar rooftop plants	Yes	Share material about potential safety hazards, and likely restriction to activity in the areas where plant and machinery are to be installed/stored.	Review compliance of Safety measures through site inspection.
